

Accelerate Your Strengths: Real World Strategies that Bring Talents to the Table

Talent at the Table: Real World Strategies that Accelerate Your Performance

(for those not familiar with strengths)

Culture, performance and the success of your business are determined when your team shows up to the table. Each interaction and moment they are involved with each other and customers, makes or breaks your business.

In this interactive, hands-on presentation participants will leave with tools that work in the real world to increase teamwork, collaboration and communication within their businesses. Key points covered:

- Why what shows up at the table makes or breaks performance
- Why clashes at the table matter and how to make them work for you
- How to make magic happen at the table and make it stick

Value to Participants:

Participants will leave with a new knowledge of what they bring to the table and tools to help them recognize what other employees and team members can contribute. Integrating this approach in your organization can fuel a corporate culture that engages and ignites the talent already present in the group.

Formats:

50 minute

2 hour workshop

4 hour workshop
